# Warranty, Claims & Information

## Shenandoah Cabinetry® Consumer Lifetime Limited Warranty

The manufacturer of Shenandoah Cabinetry hereby warrants to the original purchaser, for residential applications only, that all Shenandoah Cabinetry, cabinets and accessories, are free from defects in materials and workmanship. This warranty runs for as long as you own your home and begins upon the date of delivery to you. This warranty is expressly limited to repair or replacement of the defective part at the discretion of the manufacturer of Shenandoah Cabinetry, and does not include labor for removal or replacement. This warranty does not extend to defects caused by improper handling, storage, installation, assembly or disassembly, intentional damage, product modifications, exposure to the elements including humidity which may result in warping or splitting, accidental misuse, abuse or negligence.

Natural woods may vary in texture, color and wood grain, and exhibit subtle changes as they age. For example, wood joints may eventually have visible cracking around the joint area and cabinet colors may darken or lighten over time. Sunlight, smoke, moisture, household cleaners and other environmental conditions may cause materials to vary from their original color and/or to warp, split or crack. These variations are considered to be the nature of the material in relation to its environmental exposure and are not covered under this warranty.

### Additional Limitations and Disclaimers

THE MANUFACTURER OF SHENANDOAH CABINETRY MAKES NO OTHER WARRANTIES OTHER THAN THOSE SET FORTH HEREIN AND ALL OTHER WARRANTIES ARE HEREBY DISCLAIMED. THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO THE LENGTH OF THE LIMITED WARRANTY PERIOD. THE LIMITED WARRANTIES SET FORTH HEREIN ARE LIMITED TO THE FIRST AND ORIGINAL BUYER AND ARE NOT TRANSFERABLE THEREAFTER. IN NO EVENT SHALL THE MANUFACTURER OF SHENANDOAH CABINETRY BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES TO THE PURCHASER OR TO ANY THIRD PARTY, INCLUDING, WITHOUT LIMITATION, DAMAGES ARISING FROM PERSONAL INJURY, LOST PROFITS, LOSS OF BUSINESS OPPORTUNITY, LOSS OF PROPERTY, ECONOMIC LOSSES, OR STATUTORY OR EXEMPLARY DAMAGES, WHETHER FROM NEGLIGENCE, WARRANTY, STRICT LIABILITY OR OTHERWISE. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

## Claims

All claims for defective cabinets and accessories must be submitted to the manufacturer in writing and must specify the defects present in the cabinets and accessories. After the manufacturer has had an opportunity to inspect the cabinets and accessories, it will, at their discretion, either replace defective cabinets and accessories or repair any defects in the cabinets and accessories. All claims must be submitted to the following address: Shenandoah Cabinetry Claims Department, Post Office Box 1980, Winchester, Virginia 22604.

# Standard Cabinet Specs

## KCMA Certified

All cabinetry manufactured by Shenandoah is certified by the Kitchen Cabinet Manufacturers Association (KCMA).

KCMA sets the American National Standards Institute/KCMA 161.1- 2000 uniform performance and construction standards for kitchen and vanity cabinets. The program is referenced by U.S. Government agencies; architects; builders; remodelers; and other specifiers.

Cabinets that bear the KCMA seal of certification are recognized as a quality product with the ability to perform after a rigorous battery of tests, simulating years of typical household use. Tests are performed by approved third-party independent laboratories.

Shenandoah is proud to display the KCMA seal of certification for cabinet construction.

## Environmentally Responsible Stewardship

As a leading U.S. manufacturer of fine cabinetry, American Woodmark Corporation is committed to conducting business in a manner that both protects the environment and safeguards public health and safety. To achieve this end, the company proactively identifies potential environmental risks and monitors compliance with appropriate federal, state, local and internal standards.

The company has received certification by the Kitchen Cabinet Manufacturers Association (KCMA) Environmental Stewardship Program on all products. The certification was awarded based on compliance across a broad range of activity including air quality, product resource management, process resource management, environmental stewardship and community relations.

The company works with all suppliers to encourage sustainable forestry practices. Wood doors, drawer fronts and cabinet front frames are made from solid hardwoods. Particle board and plywood are purchased from suppliers that meet either the Composite Panel Association requirements for Environmentally Preferred Products or the Composite Panel Associations Eco-Certified Composite Standards.

The company uses leading edge technologies to limit both hazardous and non-hazardous emissions, byproducts and waste. Ongoing, formal programs identify opportunities for recycling and reusing materials. When waste ultimately requires disposal, steps are taken to minimize the environmental impact.

The American Woodmark Foundation supports local programs serving the community, including activities focused on maintaining the quality of life.

Our company is dedicated to doing our part in the preservation and sustainability of the environment.

### Cabinet Front Face Frames

Cabinet front face frames are made from ¾" x 1⅝" kiln dried hardwood to prevent warping. Face frame joints are precision fixtured, pressure fitted and mechanically fastened.

### Cabinet Side Panels

Cabinet side panels are ½" thick engineered wood. The exterior sides match cabinet finish and interior sides are finished with a natural woodgrain look. They are captured into a grooved front face frame and secured using high-strength fasteners and glue.

### Cabinet Tops, Bottoms and Floors

Tops, bottoms and floors are ½" thick engineered wood. The exteriors and interiors are finished with a natural woodgrain look. They are fitted and glued into the cabinet front face frame grooves, then captured in the grooves of the cabinet side panels.

### Cabinet Back

The cabinet back is made from ⅝" thick hardboard substrate. The inside cabinet surface is finished with a natural woodgrain look.

### Hanging Rails

The base and vanity top hanging rail is ¾" thick solid wood, mortise and tenon joined and glued to the cabinet side panels. The wall cabinet hanging rails are ½" thick engineered wood, glued and pinned into the cabinet back, cabinet side panels and top/bottom.

### Cabinet Shelves

Cabinet shelves are ¾" thick engineered wood. The shelves are finished with a natural woodgrain look. Shelves are banded on one side with edge banding. All shelves are adjustable and meet KCMA load standards of 15 pounds per square foot.

### Drawer Systems

Cabinets utilize natural finish dovetail hardwood drawers with plywood bottoms and Full-Access Hidden Glides® or Full-Access CushionClose Glides. All drawers meet KCMA load standards of 15 pounds per square foot.

### Drawer Systems – Deep Roll Out Trays

Deep Roll Out Trays utilize natural finish dovetail hardwood drawers. Deep Roll Out Trays feature side-mounted ¾" access drawer glides or Full-Access CushionClose glides. All Deep Roll Out Trays meet KCMA load standards of 15 pounds per square foot.

### Corner Blocks

Corner blocks are attached to help ensure cabinet squareness and allow for proper countertop installation.

### Hinges

Fully concealed, self-closing Hidden Hinges® are standard on all door styles.

Door Height	Number of Hinges
12" - 36"	2
39" - 50"	3

### Inset Toe Kick

Inset toe kicks are constructed of ½" thick unfinished engineered wood and are recessed 3½". Standard toe kick dimensions are 4" high and recessed 3½". Universal Design toe kick dimensions are 8" high and recessed 6½".

**BTK8 or BTK UD (matching toe kick) required for installation.**

CONTINUOUS IMPROVEMENT

In keeping with our policy of continuous product refinement, Shenandoah Cabinetry reserves the right to change specifications in design and materials as conditions require.

## Finishing Systems

The finishing systems used on our products are designed to ensure the beauty and durability of our cabinetry. State-of-the-art equipment allows precise sanding, filling and finish coverage of each of our products.

## Environmentally Responsible Finishing

Our panel finishing system uses only water-based paints and fillers, yielding neither hazardous waste nor water contamination. Our acrylic and urethane materials are 100% solids, dried using high-intensity lights, yielding no atmospheric emissions. Our products are extremely resistant to stains and surface damage that can be caused by common household chemicals. Our products exceed KCMA and ANSI standards for resistance to stains like coffee, grape juice and moisture.

## Cabinet Care

Remove dust from cabinets frequently with a soft lint-free cloth. The cloth may be slightly dampened with water or a spray type dust remover. Do not use a paste wax type material. Wax buildup is difficult to remove and will leave a residue that attracts dust and moisture. Polishes containing silicon should not be used. Clean spills immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth. Do not use detergents, citrus cleaners, ammonia-based cleaners, chlorine-based cleaners, steel wool, soap pads or abrasive cleaners on cabinets.

Extra care should be taken that cabinet finishes are not exposed to heat in excess of 200° Fahrenheit (174° for Duraform thermofoil door styles). Do not place or mount small appliances beneath wall cabinets. These appliances (such as coffee makers and toasters) can produce excessive heat, which can damage the finish of cabinets. Do not expose Duraform thermofoil doors or drawer fronts to heat created from self-cleaning ovens or ranges. The HSK (Heat Shield Kit) should be used when Duraform thermofoil cabinets are installed or mounted directly next to ovens or ranges.

## Allow Cabinets To Age Beautifully

Our cabinets showcase the careful selection of natural and engineered materials to achieve the best possible look. While every effort is made to match wood grain as closely as possible, no two pieces of wood are exactly alike, even from the same tree. These differences in natural color and grain mean that each piece will respond differently to the finishing materials used. For example, close-grained woods absorb less and will vary in color from more open-grained pieces from the very same tree. It's these variations that contribute to the beauty and distinction of quality wood products. However, exposure to sunlight, smoke and chemicals may cause some materials to fade or vary from their original color over time.

This is why cabinets, doors, drawer fronts and accessories added at a later date may not exactly match cabinets installed now. For the same reasons, door samples or displays may not represent the exact color of cabinets received at the time of shipment. Consumers should also read all cleaning agent instructions carefully before application.

Due to changes that occur from natural and environmental factors a cabinet is exposed to over its lifetime, we cannot be responsible for variations that occur in the finish of natural and engineered materials as they age.

# Door Species & Characteristics

Shenandoah Cabinetry incorporates solid hardwoods and hardwood veneers. These are natural materials with inherent variations. As such, our quality standards establish tolerance ranges for matching the hardwood pieces. Consumers should review actual samples of hardwoods in our buying centers and cabinet displays to help establish realistic expectations of variations involving wood grain, color tones, presence of knots and so forth.

These variations are at the heart of the unique natural beauty of finished hardwood. In addition, exposure of wood products to sunlight, some chemical agents and smoke can cause wood colors to change over time.

## Cherry

Cherry is a close-grained, multicolored hardwood with occasional pin knots and fine grain variations appearing as curls and waves. Natural features of Cherry include:

- Small sap pockets, pin knots and streaks
- Color ranges from pale yellow sapwood to deep reddish-brown heartwood, with occasional shades of white, green, pink or even gray
- Staining reveals subtle variations and colors that typically darken over time
- Variations within a single door

## Maple

Maple is an exceptionally hard, finely grained wood species with a fine, even texture. Darker stains will moderate the color variance; lighter stains mellow with golden hues over time. Natural features of Maple include:

- White to light blonde tones to dark reddish-brown tones
- Small mineral streaks of light blond or reddish brown that darken with stain
- Wavy, curly bird's-eye or burl graining as well as worm tracking across the grain that will darken when stained
- Variations within a single door

## Painted

Painted finishes combine hardwoods and engineered materials including solid wood, medium density fiberboard (MDF), high density fiberboard (HDF) and similar materials to achieve a product with superior stability, consistency, coverage and durability. Painted door features include:

- Visible joint lines may appear due to the natural expansion and contraction of wood
- A natural aging process that may change the tone of paint colors over time

## Duraform

Duraform uses highly-technological manufacturing processes to bond foils, vinyl films and coatings to medium density fiberboard (MDF), high density fiberboard (HDF) and similar materials to achieve a product with exceptional stability, consistency and durability.

- The finish, color and texture are consistent throughout the surface
- The surface is highly durable and easy to clean
- Materials are resistant to humidity and fading
- Refer to page 33 for standard cabinet box construction

Full Overlay door styles require decorative hardware. **To facilitate proper door operation, include at least a 1" filler between the hinged side of Full Overlay door styles and deeper adjacent objects including cabinets, walls, appliances and countertops.**

### Standard Overlay

Standard Overlay (SOL) doors are sized to show about an inch of the cabinet face frame, giving the door some visual depth.

Refrigerator Wall Cabinets

Refrigerator Wall cabinets range from 12" to 27" high and are 24" deep.

To ensure proper door function on a Refrigerator Wall cabinet, allow enough clearance for the top hinge(s) on the refrigerator door. Review refrigerator manufacturer's specifications for dimensions and clearance requirements.

When a 24" Deep Refrigerator Wall cabinet is used in a design, remember that each side of cabinet must be attached to a cabinet, wall or Refrigerator Return Panel.

Corner Wall Cabinets

Corner Wall cabinets range in height from 18" to 48".

Corner Wall cabinets must be ordered hinged left or right.

To ensure proper door function, cabinets or other design elements deeper than 12" should not be placed on either side of the Corner Wall cabinet.

If the Corner Wall cabinet is deeper than the adjacent cabinets, fillers are recommended for placement left and right of the Corner Wall to ensure proper door operation on standard depth wall cabinets.

For a finished, decorative look add Overlay Fillers (Full Overlay door styles) to Universal Fillers or Decorative Blocks to Fluted Beaded Fillers.

## Corner Base Cabinets

Inset toe kick construction requires BTK8 matching toe kick - must be ordered separately.

Corner Base Cabinets, excluding CAR36, require a minimum of 34" to fit through doorway (removal of cabinet door recommended).

To ensure proper door function on a Corner Base cabinet, a 3" Filler or Dishwasher Return is recommended for placement between the cabinet and any appliance or other design element deeper than 24".

In addition the Corner Base cabinet should be hinged opposite (e.g., if a range is placed to the right of a Corner Base, the cabinet should be hinged left).
